

SCIENTIFIC WORKSHOP 3-4 May 2011

DETECTING EVOLUTIONARY HOT SPOTS OF ANTIBIOTIC RESISTANCES IN EUROPE

EU COST Action Trans Domain - 0803

Antibiotic resistance ... a threat to humans and animals. What is the risk to the environment? Can we develop measures to control this antibiotic resistance?

Scientific experts from different countries and across disciplines, will participate in the two working groups:

WG1: Prevalence and spread of antibiotics and antibiotic resistant microbes

WG2: Antibiotics and antibiotic resistance microbes in wastewater treatment plants and animal production
